erasirometer

Ambulatory intense discard as if with branches, drawn axes To scale erosion with wall figures held to a fire To become solemnly visible, gratification of the body A curving, a fabric, tidal device a study of Sub-atomic music the absolute brightness

digitized domain

This skeleton of tiny needles This object in an electrical field

Persons or the general plastic The process of photographing digital objects

A film of extravascular Originating in igneous an appendage

Shaped by worry stones Rebellion marked with liner

Any of several shrub species point to their horns Lend plasma to the earliest silicate

The conversion of gratuitous benefit Another term includes relatives

See them water the girl watching sparks

the specimen

Mesothorax -Large energy heart field

At the attachment Swollen segments

A yellow sun, a black sun Between the wings yellow

The length of imago Dorsal longitude Denticulated at basal half

A nymph's inconvenience A collection of pet insects

Specimen -Generally speaking, among the tentacles

Fossilized species The contents are granular

Changes of skin occur The larvae, the pupae, lacunae Thoracic atmosphere

The insect is exhausted Weak and feeble light, wings glissant winged, stalked.

Common, common, uncommon Distinguished from other wrens Distinguished from the loon

The daily biology of the yield Grey matter on a micro slide Rub hind legs against

Females of a few species produce soft noises Both pairs of wings sometimes small or absent Note the inconspicuous jerking of its long tail

The song higher Feeding mainly on bright buffy underparts Feeding mainly with bright scolding rattles

Wings stalked at base Washed off abdomen Spend an ocean attached

The carapace of haunt A sound-producing apparatus Restless, resemble, raptorial hind feet Archery of a heart plucked back - its steel reverb, Listen. Faerie Drill

Each day must whimsy A kindness, a cement truck Calculus of the usual commute torture

Go under the microscope Veins in the green over grey, grey over green, oops – the grey grey The fairy fly terminate in hairlike fringe

Full body vibration as earth charged flesh with a zing zazz Tectonic nerve tissue Excavation of bones for romance

We held hands beneath the dirt We wanted to be trees Aphrodite

The mother of love says go on give it open up The crown heart thrush rises – to overlook precipice Take aim, glowing out light embers Cicatrix phosphenes in the fire radial

Belly was the boulder belly the chasm Upright stone slab – a storm of grey wanting She lifts, fragments:

Membrane wing,

two breath, flesh devour

Spiny, comb bearer, little

ring

Ungulates

Love says: look and I am you.

Gloria

To you in the highest Comestible sunset A celestial body outlaw Close enough to dump material on that other star

Mad math of the prism Mother of light Helios – mouth of the annelid Of invertebrate starts Maw of the under beyond Pineal subways, circulatory systems, sudden moon phases Pumping vessels flowering ganglia

Gloria, fair Gloria, olive Gloria, midnight Ejecting plasma

bioluminadolescence

When light sticks inside bodies The viscous imaginary A protective sheath, a plastic coating, a waterfall

Orbital schema – an awkward grinding Grey over buoyant grey, a rainbow scrape

When light sticks inside bodies Bug jelly maths Porifera make new hydras Give Zeus the finger

A parthenogenetic hum Stuns the ocean floor

Leaves shoot duodenal refuse A vein of cellular debris But, to chop it – A clutch of pearls through the stained glass A pawing at the branches

When light is a family of bones When light deviates
